

Interdisciplinary Doctoral Conference 2024

Detailed style guide for abstracts

General text requirements:

- The abstract can be uploaded on our website (dok.pte.hu/idk) after registration.
- To upload your abstract, you can use the TEXT BOX provided for this purpose, where you can copy or type the text of your abstract.
- After selecting the type of presentation, you can enter the title of the presentation and the keywords (maximum 5).
- When entering authors, you can add an unlimited number of authors by clicking on the "+" or Add button.
- Please select the appropriate section (and subsection, if any) for your research topic, which will help the organisers to categorise your presentation into a proper section.
- The abstract body text (excluding title, authors, keywords) should be a minimum of 500 and a maximum of 2500 characters. A counter at the bottom of the text box indicates the current length of the abstract.
- Each speaker may submit one oral and/or one poster abstract to the conference.

Some requirements regarding the contents of the abstract:

- The abstract should include the *Introduction, Aim, Method, Results* and *Conclusions*. They have to focus on new results of the research and highlight the importance of the work presented.
- Different scientific branches do not share the same publication standards, thus some parts of the abstract template given at the end of this guide can be omitted, merged, or new parts can be added. In every case, authors should use the same style given in this guide.
- For creating an uniform referencing style please follow the instructions of the *citation guide* given below.
- *Acknowledgement* (if needed) follows the main body of the abstract and precedes *References*.
- The title of the abstract and the title of the talk presented at the conference should be the same.
- Tables, diagrams, pictures, and figures are not allowed in the abstracts.

One author is allowed to upload two abstracts (an oral presentation and a poster).

Please note, that leaving the rules of this style guide out of consideration could lead to the rejection of the submitted abstract.

Citation Guide

Please make sure that your *References* section is edited according to the citation rules listed here. In the body of the abstract all references, must be cited consecutively in numerical order.

Do not use footnotes for references!

Please do not list any other references other than those mentioned in the text.

The date of download should be indicated in case of online references.
